

JUICE
IMMERSIVE

Introducing Spawnpoint Enterprise.

Premium solution, rapid deployment, lasting impact

- Create a virtual showcase to immerse clients in your products & brand
- Offline friendly, centralised deployment from a single PC
- Centralised, real-time control
- No motion sickness
- No learning how to use teleport controls or joysticks
- Intuitive, 1-2 button control schemes
- More immersive = more effective
- Full local device management for all headsets
- Analytics tracking built in

| What is Free Roam VR?

A collaborative, multi-user Virtual Reality management & hardware experience.

Create an engaging, **multi-user** immersive experience with **free roam VR**. Users can walk around, high five and collaborate in a shared space:

- Users are tracked and synchronised automatically through a **simple mapping process**.
- Control the entire experience from the **central interface**.
- Next-level immersion to improve **user engagement, retention and understanding**.

The system is **Easy to Use** – no learning about teleporting or getting motion sick from joystick controls, people move around by walking around.

We can provide full **end-to-end development** services for the creation of **new and bespoke content**, fully integrated and ready to go!

SPAWNPOINT

THE **ULTIMATE** FREEROAM VR PLATFORM
